

Anchor SurTrac™ Cantilever Slide Gates In-Stock Program

- FRAME RIGIDITY** Square aluminum frame ASTM B221, Alloy 6063, Temper T5 engineered for great strength to weight ratio.
- MAINTENANCE-FREE** Gates have welded corners and joints, no bolts to come loose.
- ENGINEERED DESIGN** Enclosed top track system eliminates debris collection & exposure to the elements.
- WEAR RESISTANT** SurTrac™ high carbon chromium steel roller assembly provides corrosion resistance and long life.
- EASY INSTALLATION** Adjustable truss rods allow for fine tuning of gate height in the field.

Innovation, Quality, Experience

For more than 40 years, Anchor has set the standard for innovative cantilever slide gate design. Anchor developed the first and most advanced enclosed track system, SurTrac™, a system that allows for nearly effortless gate operation and prevents premature gate wear. For added security, barbed wire kits can be added to any gate. And if access control is engineered into your gate plans, Anchor can handle that too. Simply order your gate with an electric gate hardware kit.

In-Stock Availability

Traditionally, Anchor gates have been made to order to meet the exacting demands of our customers. However, there are times when fast delivery is required. To meet your needs Master Halco is committed to ready stock our 6' high aluminum cantilever slide gates for 20', 24' and 30' gate openings. These gates can be fitted with barbed wire kits and have the hardware mounting option for manual or electric operation.

*Now you can have the custom quality of an
Anchor Gate in days not weeks!*
